Update Your Zoom Browser - [instructions from Zoom support](#)

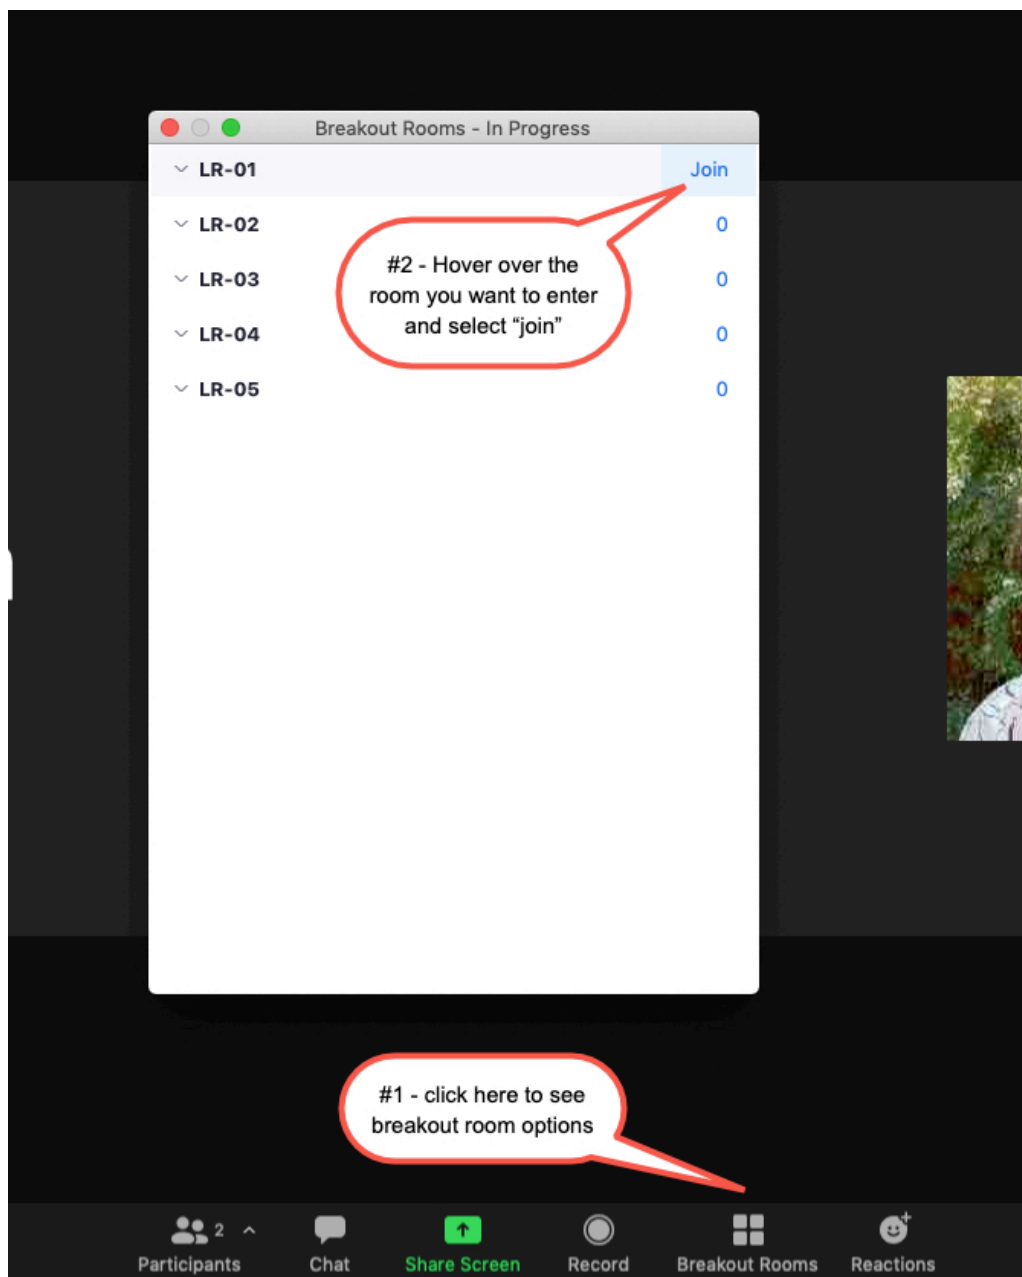

To optimize your experience, it is very important that you update your Zoom browser to the latest version. Otherwise, you will not have access to some functions we will be using. From your desktop Zoom client, check for updates and update your Zoom browser to the latest version.

Instructions for the Synchronous Poster Sessions on 4/29, 1:30p-2:15p

This requires you to have the latest Zoom browser to utilize the function in which you can move yourself between breakout rooms.

There will be 4 concurrent poster sessions with authors present to answer your questions. In each poster session, breakout rooms are organized by poster number. Once you enter a poster session, you can choose to move into a breakout room and switch between rooms. See diagrams below for instructions.

To switch breakout room, click on "breakout rooms" again, then select "choose breakout room" to see the room options.
